Government college of Engineering, Amravati

Presents

ETAS

(Electronics and Telecommunication Association of Students)

30 August 2023

A great platform was provided to showcase creativity of students by ETAS. E-POSTER DESIGNING CONTEST was arranged by ETAS for the students of Electronics and Telecommunication department. As saying goes it is necessary to portray a great idea on the paper, ETAS made it more appreciable as it did not comprise any particular theme. Everyone was free to design the ideas they have and use online tools.

Thirty students participated in the contest and showcased a variety of posters. Some technical topics, posters of conduction of webinar, and women empowerment were themes used by students. Limited time was given to design the poster and they were told to submit their posters online via a google form under

the given deadline. Poster dimensions were specified for accuracy. Deadline for the submission was 24/08/2023 till 4 pm on Thursday. After submission ,an anonymous online voting was conducted. Posters were uploaded without the designer's information on it. This made sure that the result will be authentic without partiality.

The results were announced. NIKHIL GAIDHANE from final year emerged as the winner while ARYA KULARKAR from 2nd year became the runner-up of this E-POSTER DESIGNING competition. All the participants were provided with participation certificates and winners got winning certificates and medals.

This contest improved the expressing skills and creativity of students. It made sure to le students explore various online platforms for designing. With the guidance of ETAS faculty incharge R.R. Harne ma'am and support of students the event reached a successful end.

The following are the winning posters:
