## EVENT REPORT OF A EXPERT LECTURE TALK

Conducted by ISTE (Computer Science and Engineering Department)

5 August 2022,

Since the 21<sup>st</sup> century started technology has evolved drastically. Many students are preparing to get a job in the IT industries such as Google and Amazon. TCS etc. At the time while studying for their degree they don't know what culture in the IT industry looks like or what difficulties they will face in it.

So, by looking at all these facts ISTE student chapter under the computer science department has organized the event on "**IT Industry Orientation- The Untold facts**" on **5 August 2022** given by the Expert Lecturer **Mr. Sanket Shiralkar**. He is currently working as a technologist in an IT company with prior experience in FIS Global, TCS, and BNP Paribas.

The expert lecture was conducted for the 2nd-year, 3rd-year, and 4th-year students of the computer science department. Mr. Sanket Shiralkar told us about what the culture in the industry looks like. What are service-based, and product-based companies work, and how as IT professionals we are going to work there? It was an amazing experience to get to listen to his journey.

The session ended by solving the queries of students which they asked the expert lecturer.
